KILL MORE THAN WILD BEASTS.
The number of people killed yearly by
wild beasts don't approach the vast
number killed by disease germs. No life
is safe from their attacks. They're in
air, water, dust, even food. But grand
protection is afforded by Electric Bit-
ters, which destroy and expel these de-
adly disease germs from the system. That
is why chills, fever and ague, all malarial
and many blood diseases yield promptly
to this wonderful blood purifier. Try
them, and enjoy the glorious health and
new strength they'll give you. Money

Swat the Fly.

Keep the flies away from the sick, especially those ill with contagious diseases. Kill every fly that strays into the sick-room. His body is covered with disease germs.

Do not allow decaying material of any sort to accumulate on or near your premises. All refuse which tends in any way to fermentation, such as bedding straw, paper waste and vegetable matter should be disposed of or covered with lime or kerosene.

Screen all food. Keep all receptacles for garbage carefully covered and the cans cleaned or sprinkled with oil or lime.

Keep all stable manure in vault or pit, screened or sprinkled with lime, oil or other cheap preparation. See that your sewage system is in good order; that it does not leak, is up to date and not exposed to flies. Pour kerosene into the drains.

Cover food after a meal; burn or bury all table refuse. Screen all food for sale. Screen all windows and doors, especially the kitchen and dining-room.

Burn pyrethrum powder in the house to kill flies.

Don't forget, if you see flies, that their breeding-place is in near-by filth. It may be behind the door, under the table, or in the cuspidor.

If there is no dirt and filth, there will be no flies.

If there is a nuisance in the neighborhood, it would be advisable to write at once to the health department.

GREENWOOD.

Previously reported the birth of a boy July 4th, to Mr. and Mrs. L. E. Edmunds. Some facts pertaining to this incident may prove of further interest.

The mother of the child is 18 and the grandmother 37, the latter having been married just 21 years to a day before the birth of her first child.

The great-grandmother of this baby is 56 and the great-great-grandmother is 78. There we have five generations represented in this family, all living and in vigorous health; also they are all living in this town.

There are other families, a very few in the State, represented by five living generations; it is doubtful if such a family can be found all residing in the same town.

Again, it is a question if so far as ages of the different ancestors is concerned can any family be found in the State. So we are claiming the distinction for our town until satisfactory evidence to the contrary is produced, of having the youngest great-great-grandmother living at the head of five generations, all living at this time.

J. O. King lost his dog Saturday. Jack has always been an insurmountable aversion to automobiles and has labored under the delusion that by running closely in front of them, barking ferociously, he could put an end to their existence. He got too close, made a mistake, the heavy machine passed over him and he, let us hope, is barking now in a heaven reserved especially for dogs.

The Home-Made Buckle.

When a buckle is required for a dress and you don't care to spend a lot of money, try this: Cut out the shape you want in heavy cardboard. Cut it with the material of which the dress is made and then trim it with whatever trimming is being used. A pretty one was made of row after row of beads to match a dress trimmed with bead fringe. Cover one with lace, gold tissue, or anything ornate and see what a pretty, inexpensive ornament for the back or front of a girle you have.

Attractive Curtains.

The attractive curtains of my den which have been generally admired, are made not of Russian crash, as every one supposes, but of the heaviest grade of hand woven kitchen toweling, says a contributor to the Designer. This comes nineteen inches wide and can be found at the large department stores for 12 1/2 and 15 cents a yard. The curtains have a conventional design in stencilling as a border and hang without fullness from small brass rods. With another set of curtains of the same material there are wide bands of cretonne, which make a most effective border.

The three story wooden annex was saved as were three nearby residences which also caught fire at one time. The hotel which was built in 1861, was leased to Frank R. Headaches and Their Treatment.

In treating a headache, there is one safe rule to follow:—Never use any medicine containing acetanilid or similar coal-tar derivatives without the advice of your physician. They may give temporary relief, but they almost never reach the cause of the trouble and are likely to weaken the heart. The most common form of headache, frequently called sick headache, arising from a disordered stomach, may be avoided by care in the choice of food. Shun pastry, candy and rich food, take time to eat, chew your food thoroughly and keep your bowels in good condition by using one-half to one teaspoonful of L. F. Atwood's Medicine after each meal. This old reliable remedy has been a perfect blessing to thousands for sixty years. Get a bottle today, and prove it for yourself. Any dealer has it for thirty-five cents, or

Mr. and Mrs. William Twombly of Norway have been to visit Mr. Twombly's sister, Lydia Stuart.

Rev. W. P. Lord will deliver an address under the auspices of the W. C. T. U. next Sunday evening, the 30th. If the weather permits the service will be held in the open air. The men especially are invited to be present. It is hoped all will avail themselves of this opportunity to listen to an enthusiastic and eloquent speaker.
